

RSVP Life Saving Percentage (2017)

RSVP uses the “save rate” as our lifesaving percentage.

The formula for the save rate, as defined by Maddie's Fund is as follows:

$$\text{save rate} = \frac{\text{intake} - \text{euthanasia}}{\text{intake}} \quad \text{Note: includes animals in house}$$

$$= \frac{(16+70) - 0}{(16+70)} \quad \text{Note: (beginning animal count + intake) - euthanasia}$$

$$= \frac{86}{86}$$

$$= 1$$

The save rate for 2017 is 100%.
